AI-ML & GEN-AI Track | Project Phase Documentation

Date	30 September 2026	Team ID	SWTID-2026-8540
Project Name	AI BlogNest API	Track	AI / ML / Generative AI
Team Size	5	Maximum Marks	3 Marks
Team Leader	Pravin kumar .P	Members	Abdul Rahaman .A; Dhamotharan .G; Maharaja .C; SUBHASH S

Customer Problem Statements

PS	Customer	I am trying to	But	Because	Which makes me feel
PS-1	Content Author	create quality blog drafts quickly	manual drafting takes time and revisions are repetitive	there is no integrated AI-assisted workflow	delayed and less consistent
PS-2	Editor / Admin	review and control publishing safely	multiple roles need different permissions	content workflows are not centralized	concerned about unauthorized changes
PS-3	Reader	find useful published content and interact	content may be difficult to filter or moderate	categories, tags and comments need structure	frustrated by poor discoverability
PS-4	System Owner	maintain reliable backend operations	validation, security and logging must be consistent	common web risks can affect APIs	concerned about reliability

Core problem statement

The team needs a secure, modular backend that centralizes blog creation, content organization, AI-assisted drafting and summarization, role-based authorization, comments and supporting management functions in one API platform.
