## Customer Journey Map

| Journey Stage     | User Action                       | Touchpoint                | Thought / Feeling                 | Owner           | Improvement Opportunity                     |
|-------------------|-----------------------------------|---------------------------|-----------------------------------|-----------------|---------------------------------------------|
| 1. Discover       | Chooses to create a blog          | API client / application  | I want a faster way to start      | Author          | Simple create flow and clear request schema |
| 2. Authenticate   | Logs in and receives access token | Auth API                  | Access should be secure           | Auth middleware | JWT validation and role checks              |
| 3. Draft          | Submits topic / content request   | Blog API / AI API         | AI should save time               | Author service  | AI generation endpoint and validation       |
| 4. Organize       | Adds categories/tags and metadata | Content APIs              | I need easy retrieval later       | Author / Editor | Taxonomy and metadata structure             |
| 5. Review         | Editor checks draft / comments    | Protected endpoints       | I need controlled approval        | Editor          | Role-specific route guarding                |
| 6. Publish / Read | Published post becomes available  | Public read APIs          | Content should be easy to consume | Reader          | Search, filtering and stable responses      |
| 7. Improve        | Summarize / review engagement     | AI / analytics-ready APIs | I want to refine content          | Author / Admin  | Summaries, logs and metrics                 |
