Level-0 Data Flow Diagram - AI BlogNest API

The following logical flow is derived from the project architecture in the reference documentation: requests enter through the Express server gateway, pass authentication/validation, reach business services, interact with MongoDB through Mongoose, and may invoke Gemini AI services.

Main data movements

From	To	Data
Client	Express API	HTTP request + JSON payload + JWT
Express API	Auth / Validation	Token + validated input
Services	MongoDB	Users, posts, comments, taxonomy, metadata
AI Service	Blog / Summary Service	Prompt / article context -> generated content / summary
Services	Client	JSON response + status / error information
