

Problem-Solution Fit

AI-ML & GEN-AI Track | Project Phase Documentation

Date	30 September 2026	Team ID	SWTID-2026-8540
Project Name	AI BlogNest API	Track	AI / ML / Generative AI
Team Size	5	Maximum Marks	5 Marks
Team Leader	Pravin kumar .P	Members	Abdul Rahaman .A; Dhamotharan .G; Maharaja .C; SUBHASH S

Problem-Solution Fit Canvas

Canvas Area	AI BlogNest API
1. Customer Segments	Authors, Editors, Administrators and Readers who use a blog platform.
2. Problems / Pains	Manual drafting, fragmented workflow, role-control gaps, comment moderation effort and difficulty summarizing long content.
3. Triggers to Act	Need faster content creation, centralized management or safer role-based publishing.
4. Emotions Before / After	Before: repetitive, time-consuming and fragmented. After: more structured, assisted and traceable workflow.
5. Available Solutions - Pros / Cons	Traditional CMS tools provide CRUD workflows but may require separate AI services or custom security layers.
6. Customer Limitations	Different user roles, varying technical ability, limited time and need for secure managed access.
7. Behavior + Intensity	Authors create/edit frequently; Editors review; Readers mostly consume; Admins manage controls.
8. Channels	Web/mobile client, REST API clients, administrative tools and direct public read routes.
9. Problem Root Cause	AI assistance, content management and authorization are often implemented as disconnected modules.
10. Your Solution	A modular REST API combining blog management, role-based security, AI generation/summarization and supporting content services.
