Project Proposal - AI BlogNest API

Item	Details
Project Objective	Build a secure, modular REST API that combines blog management with AI-assisted generation and summarization.
Scope	Authentication, role-based access, blog CRUD, categories/tags, comments, media metadata, search, AI generation and summarization.
Problem Addressed	Manual and fragmented content workflows increase effort and reduce consistency; protected workflows are needed for multiple user roles.
Expected Value	Faster draft creation, centralized content control, reusable API services and structured AI assistance.
Primary Users	Admin, Editor, Author and Reader.
Core AI Features	AI blog generation and intelligent summarization; AI FAQ assistance can be supported as an extension.
Security Controls	JWT, bcrypt.js, role-based access control, input validation, sanitization, rate limiting and logging.
