

Code Layout, Readability and Reusability

AI-ML & GEN-AI Track | Project Phase Documentation

Date	30 September 2026	Team ID	SWTID-2026-8540
Project Name	AI BlogNest API	Track	AI / ML / Generative AI
Team Size	5	Maximum Marks	5 Marks
Team Leader	Pravin kumar .P	Members	Abdul Rahaman .A; Dhamotharan .G; Maharaja .C; SUBHASH S

Code Layout, Readability and Reusability

Layer / Folder	Expected Content	Readability / Reusability Rule
server.js / app.js	Server startup, Express configuration, middleware registration	Keep bootstrap code minimal and centralized.
models/	Mongoose schemas and data models	One model per domain entity with explicit validation.
controllers/	Request handlers and response formatting	Keep controllers thin; delegate business rules to services.
routes/	HTTP endpoint definitions	Use predictable resource naming and middleware composition.
services/	Blog, comment, AI and other domain workflows	Reuse shared logic instead of duplicating code.
middleware/	Authentication, authorization, validation and error handling	Keep cross-cutting concerns isolated.
config/	Environment and DB configuration	Read secrets from environment variables; never hard-code keys.
utils/	Logging, sanitization helpers and common utilities	Prefer small pure helpers with clear names.
