Coding & Solution

Module	Coding / Solution Approach	Validation / Security
Authentication	Register/login flow with hashed passwords and JWT issue/validation.	Input validation, bcrypt.js, JWT verification
Authorization	Role matrix for Admin, Editor, Author and Reader.	Protected route middleware
Blog Management	CRUD operations plus status workflow for Draft, Pending Approval, Scheduled and Published.	Schema validation + role checks
AI Generation	Dedicated AI service endpoint for blog generation.	Validate prompt/context; protect API credentials
Summarization	AI service endpoint for semantic compression of long article payloads.	Validate input length and handle service errors
Comments	Create and moderate comments with approved/pending/spam states.	Authorization + sanitization
Taxonomy / Search	Categories, tags and searchable content metadata.	Validated query parameters
Operational Controls	Centralized error handling, structured logging and rate limiting.	Consistent status codes and safe error messages
