

Project Executable Files

AI-ML & GEN-AI Track | Project Phase Documentation

Date	30 September 2026	Team ID	SWTID-2026-8540
Project Name	AI BlogNest API	Track	AI / ML / Generative AI
Team Size	5	Maximum Marks	3 Marks
Team Leader	Pravin kumar .P	Members	Abdul Rahaman .A; Dhamotharan .G; Maharaja .C; SUBHASH S

Project Executable Files / Expected Package

The project executable package should contain the backend source in a modular Server folder. The exact file set can be finalized against the implemented repository before submission.

Path	Purpose
Server/server.js	Application entry point / server startup
Server/app.js	Express application configuration
Server/models/	User, Post, Comment and related schemas
Server/controllers/	Request processing logic
Server/routes/	REST endpoint definitions
Server/services/	AI and domain service integrations
Server/middleware/	JWT, RBAC, validation, sanitization, error handling
Server/config/	MongoDB and environment configuration
Server/utlis/	Logging and reusable helpers

Run checklist

1. Install Node.js and npm dependencies.
2. Configure MongoDB connection and Gemini/API secrets in environment variables.
3. Start the backend with the project start script.
4. Exercise authentication, blog, AI generation and summarization routes using Postman or Thunder Client.
